EDUCATION

University of Vermont (UVM), Burlington, VT

Expected Graduation: May 2026

Bachelor of Science in Computer Science

GPA: 3.65

Minors: Mathematics and Business Administration

- **Relevant Courses:** Software Engineering, Data Structures & Algorithms, Algorithm Design & Analysis, Database Systems, Web Development, Decision Analysis, Operations Management, Advanced Programming
- **Languages:** Python, C/C++, Java, JavaScript, SQL | **Web:** HTML/CSS, PHP
- **Tools/Libraries:** Pandas, NumPy, R, MATLAB, Tableau | **Version Control:** Git

WORK EXPERIENCE

GlobalFoundries, Essex Junction, VT

May 2025 – Aug 2025

Summer Manufacturing Operator

- Achieved **highest throughput** on D1 shift with consistently strong wafer output
- Operated and managed high-volume tools, running quality lots as needed
- Collaborated with maintenance and process technicians for tool status and wafer support

University of Vermont, Burlington, VT

Jan 2025 – May 2025

Teaching Assistant – Algorithm Design & Analysis

- Evaluated and graded weekly written homework assignments, ensured accuracy and clarity in solutions
- Assessed biweekly **Java** programming assignments, providing constructive feedback on code quality and efficiency

Matthew Cooper Insurance Agency, Revere, MA

May 2022 – Aug 2024

Customer Service Representative

- Developed new business quotes to meet client needs and provided guidance on policy options
- Managed client inquiries, both in-person and over the phone
- Remarketed renewals to enhance client retention and strengthen long-term relationships with customers

Tesla, Peabody, MA

May 2023– August 2023

ADAS Test Operator

- Operated engineering vehicle for data collection, ensuring accurate recordings and **troubleshooting** equipment/software issues as needed
- Uploaded **hundreds** of clips daily from hard drive to the computer using **CLI** commands
- Analyzed collected data, provided feedback to improve processes, and updated the engineering team with daily drive reports

PROJECTS

Course Prerequisite Visualizer, Burlington, VT

August 2025 – Present

- Automated extraction of **1000+** course entries from UVM's Schedule of Courses using **Selenium** and **BeautifulSoup**; processed and cleaned data with **Pandas**
- Implemented NLP system via **OpenAI API** to structure prerequisite relationships

NFL Prediction System, Burlington, VT

October 2025 – December 2025

- Developed **automated data pipeline** integrating Reddit sentiment, sportsbook odds, and historical game stats using **REST APIs** and **PostgreSQL**, implementing **cron jobs** for continuous ingestion and backfilling
- Trained predictive models using linear regression and sentiment features to forecast weekly game outcomes

Burlington Crime Analysis, Burlington, VT

Nov 2024 – Dec 2024

- Built visualizations using **R**, **ggplot2**, and **Google Maps API** to map incident density and temporal patterns
- Developed a **classification tree model** achieving **~86% accuracy** in predicting firearm use based on incident type and subject behavior
